

BERNAT FELTING WOOL EASY SLIPPERS

IMPORTANT TO KNOW BEFORE FELTING

- Record all the measurements and changes before and after felting. You will be able to adjust the method to produce proper results.
- Always test a sample. Different colored yarns may felt differently.
- Colorfastness can be affected by very hot water.
- Any knit fabric that has been properly felted becomes very dense and matted.

HOW TO FELT

- Using low water level, run a Hot/Cold cycle for 5 to 15 min. Add a pair of old jeans for agitation.
- Add 2 tablespoons of baking soda for a small load. After one cycle, check for size. Repeat if necessary.
- Run through the rinse and dry spin cycle.
- Do not use a clothes dryer.
- Lay felted piece onto a dry towel, away from direct heat or sunlight.
- Shape piece to correct measurements.
- If an edge ripples, baste a thread through the edge and gather in. Remove the thread after the felting is dry.
